

## HAYS Recruiting Worldwide London HQ New Data Room

Client:  
HAYS Recruiting  
Worldwide

Location:  
London -UK

Project:  
Room & Ceiling  
Void Protection

HAYS recruiting worldwide operate in 31 countries, from 255 offices, with 7,620 employees, and provided 60,000 job placements & 190,000 temporary placements in 2011. Having relocated to this prestigious new flagship building in the heart of the City of London, vital IT systems were protected by **Firepro**.

Project By:

Type of Protection:

With City rents increasing, space was at a premium for IT system cabinets to serve the needs of the business. Optimum fire cover could not be compromised; therefore **Firepro** was the obvious choice to provide the automatic room flooding for the protection of the facility. This was achieved with modular **Firepro** units that fitted directly into the ceiling void, as well as the room.

Type of  
Protection:  
Total Flood  
Room & Ceiling  
Void

Fire Protection:

**FP-200S**  
**FP-500S**  
**FP-3000**

The Task:

Design, supply, install, commission, maintain fire detection & alarm system for the brand new data room against the threat of fire with **FirePro** fire extinguishing units.

We **identify** risks - We **design** solutions - We **prevent** disasters

## Risks Involved & Consequences:

As with most fires there will always be a variety of materials that may have combusted and dependent on the stage of the fire – the **FirePro** Units will extinguish fire – without producing any harmful effects to assets and human lives.

Furthermore, fire damage and the consequential undue and prolonged interruption to the functioning of equipment used in critical procedures had to be avoided.

## Solutions:

All **FirePro** units are manufactured under strict quality and environmental management standards according to international standards and requirements.

## Results & Implementation:

With no pipe to install - No footprint for gas cylinders – No major Health & Safety Issues to worry about – The array of crucial information within the Data room is protected by **Firepro** units installed at ceiling level and within the ceiling void – which will function exactly the same way a gas extinguishing system would – at far lower cost of ownership, and extremely reliable & proven fire extinguishing capabilities.

Description/Details	Quantity	Type
<b>Fire Protection Units</b>		
Ceiling Void	3	<b>FP-200S</b>
Ceiling Void	1	<b>FP-500S</b>
Total Flooding (Room)	2	<b>FP-3000</b>
<b>Fire Detection / Alarm System</b>		
Co-Incidence Controller		

## Advantages of **FirePro**:

- certified environment friendly “green” fixed extinguishing solution
- no harmful residues or deposits
- does not produce harmful or toxic gases when in contact with a fire
- does not reduce oxygen content within risk when discharged
- leading certified condensed aerosol product – represented in 70 countries
- no pressurised gas cylinders
- fully modular, protects the smallest risk to total flooding application
- installed in less time than conventional gas extinguishing systems
- rapid deployment & re-installation in hours to re-arm – not days
- wall or ceiling mounted for room applications, Installed inside risk also
- no gas pressure reduction arrangements to facilitate gas release
- no risk of operative injury - such as accidental cylinder detonation
- no distribution hydraulic design, pipe fabrication, or installation

We **identify** risks - We **design** solutions - We **prevent** disasters
